### ABS/EBS

At B.D.F. Commercials we are fully equipped to carry out repairs to trucks and trailers fitted with ABS and EBS braking systems.

As appointed WABCO and Haldex service centres we are able to diagnose and repair faults on these systems but we can also diagnose and repair faults on the Knorr-Bremse braking system. We are equipped for truck diagnostics also.

As this is a P.C. based diagnostic system, it is easily used in the workshop or by our qualified engineer in our roadside assistance vehicle.

We are also qualified to diagnose and repair faults in Electronic Controlled Air Suspension(ECAS) and Trailer Central Electronics (TCE).

We carry an extensive range of ABS/EBS valves, sensors and replacement ECUs. All ECUs replaced and programmed on site.

We supply replacement ABS or EBS braking systems for trailers. These kits are suitable for all trailers equipped with air brakes and our ABS kit will give the driver enhanced diagnostics similar to trailer EBS.
